DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4, 6-11, 113-22, 24-33, 35, 36, and 38 are allowed.
2. The following is an examiner's statement of reasons for allowance: Rushing (US Pat. 5,641,241) discloses barrier 12 including a plurality of paddles 24 (stanchions) separated an equal distance apart, each paddle including a body portion 26 and a base portion 28; a lighting tubing 36 is threaded through the orifice 44 of the glare paddles 24; the device powered by an electrical power device 40. Magdaleno, II et al. (US Pat. 5,641,241) discloses a programmable infrared marker used as a portable landing zone marker used for an aircraft landing zone. York (US Pat. 4,090,472) discloses a fencing system including a plurality of posts 52 set up to hold a flexible hot line 54 and warning or guard line 56 as well as subassemblies 38 with tubular sleeves 42 positioned to be inserted into an extending ground plate 40. However, none of these references nor any of the references stated as prior art disclose the claimed barricade system for an airport taxiway comprising supports positionable in a spaced-apart fashion across the airport taxiway; and a lightable rope which is fastenable to the supports to close the airport taxiway to vehicular traffic and which is energizable by a single electrical power source, wherein the supports and the lightable rope are sufficiently frangible, in structure, such that when they are contacted by a rotating propeller, they are knocked over or destroyed by the propeller of a plane without damaging the propeller.
